

Retail Management Software

“ The Pos2go Retail Management Software is a powerful business management solution developed specifically for retailers. It is designed to escalate profit in a challenging market by increasing sales and successfully managing inventory, suppliers, pricing, promotions, staff and customers. ”

Point-of-sale

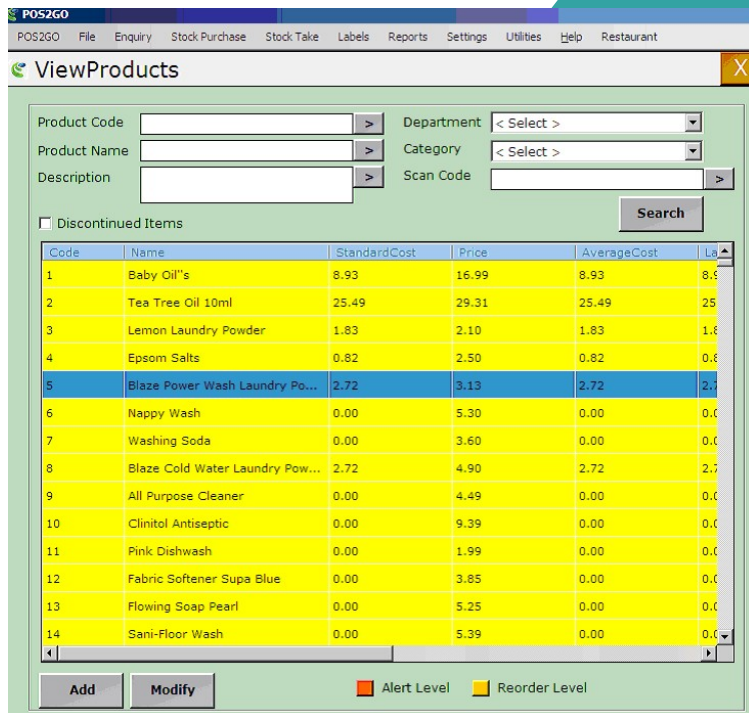

Simple and intuitive point-of-sale you'll love to use.

So simple. Easy-to-use interface, built on the latest technology. It's fast, responsive, and easily customised.

Windows based touch-screen friendly. User interface is designed to work with both mouse and keyboard, as well as touch-based input, on a wide variety of devices. So it works the way you want to use it, on the equipment you already own.

Product management

Managing your products is a breeze. Easily add, edit and remove products, including stock changes and taxes. Flexible pricing options include full support for price breaks, discounts, sale campaigns, and specific pricing by location and by customer.

Windows XP

Windows Vista

Windows 7

Our point of sale software runs on Windows 2000, XP, Vista and Windows 7

- Inventory Control
